

ALI ARMANI

JavaScript Developer

armani.ali@proton.me | github.com/Ali-Armani | linkedin.com/in/aliarmani | ali-armani.github.io

SUMMARY

JavaScript developer with a strong foundation in HTML, CSS, and modern JavaScript (ES6+), gained through self-directed study and a real freelance client project. Delivered a complete, responsive e-commerce website independently, from planning through deployment, with a focus on clean code, web performance, and usability. Comfortable working remotely and asynchronously with clients. Currently deepening frontend skills with React.

TECHNICAL SKILLS

Languages & Core: JavaScript (ES6+), HTML5, CSS3

Practices: Clean & maintainable code, Responsive / Mobile-First Design, Web Performance Optimization, UI/UX Fundamentals, Web Accessibility, Debugging

Tools & Collaboration: Git, GitHub (version control), remote client collaboration, AI-assisted development workflows

Currently Learning: React

PROJECTS

4Kids Doll Shop — E-Commerce Website

Freelance Client Project (Remote)

- Independently designed and built a responsive e-commerce website from scratch for a real retail client using HTML, CSS, and JavaScript, collaborating remotely from requirements through launch.
- Applied UI/UX principles to create an intuitive browsing experience aimed at increasing time on site and conversion.
- Reduced product image file sizes, delivering a significant improvement in page load speed — an early, hands-on application of web performance optimization.
- Used AI-assisted tools to speed up debugging and keep the live site consistently stable and up to date.

Live: 4kids-shop.pages.dev

TaskFlow — Task Management App

Personal Project

- Built a fully responsive to-do/task management app in HTML, CSS, and JavaScript, focused on clean UI/UX and intuitive task workflows.
- Applied core JavaScript logic for task handling and debugging, ensuring consistent behavior across devices.
- Used AI-assisted development, including trained prompt-engineering practices, to speed up iteration while retaining full control over code quality and design decisions.

Personal Portfolio Website

Personal Project

- Developed and continue to maintain a personal portfolio site, addressing accessibility and semantic HTML improvements.

EDUCATION

B.A. in English Language Teaching

Expected 2027

- Self-taught web development (HTML, CSS, JavaScript) alongside formal studies.

LANGUAGES

Persian: Native

Turkish: Fluent (lived and worked in Istanbul)

English: B2 (Upper-Intermediate)
